Please stop the assault on Microsoft and the freedom to innovate. To whom it may concern As an employee of Microsoft I can ASSURE you that technology is in its INFANCY. This is not the time or era to try and legislate innovation. The world and the technology industries are many many many years from true infrastructures on which to build the future. If we don t give key players like Microsoft room to innovate the future will be a long time coming. Your behavior and actions affect all companies who desire to serve customer demand and enhance our world. Get off Microsoft s back and out of legislating the technology industries. Come back in 50 years when we have true solid technologies that may require government regulation. Now is NOT the time for this. Thank you for listening.
